

VicRoads Pit, Cast Iron Access Cover & Frame

VicRoads Pit, Cast Iron Access Cover & Frame

Viscount Rotational Mouldings (VRM) has worked in conjunction with road authorities to bring you the VicRoads pit, cast iron access cover & frame, providing a solutions for buried electrical cabling and traffic services.

VicRoads Pit:

Viscount 600mm diameter service pit is designed to support a variety of cable installations for the Road Authorities.

Approved by VicRoads (#96-H700-01).

The pit is manufactured from strong UV stabilized black polyethylene.

VicRoads Cast Iron Access Cover & Frame:

The VicRoads Cast Iron Access Cover and Frame is fully machined to insure a correct fit, every time.

The lid and frame are manufactured from strong, high strength ductile iron grade 600-3 to AS1831, providing lightweight construction while maintaining maximum strength and integrity.

The access cover is 24kg in weight, equating to a 20% reduction in cover lifting weight compared to that of most standard lids and frames on the market at more than 30kg.

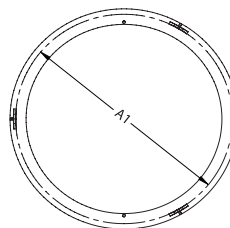

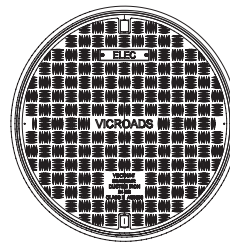

- VicRoads approved (#PA 0300 261)
- Class B 80kN load rated to AS3996:2006
- Non-slip surface.
- Blends in to surrounding environment.
- AS3996 - compliant keyholes with plastic keyhole plugs
- Nameplate options available

Detector Pit:

VRM's Detector Pits are manufactured from strong UV stabilized black polyethylene. They provide an alternative to expensive, heavy and fragile, concrete cable housing.

Plastic Resin Lockable & Nonlockable Lid

Manufactured out of high density polyethylene, the plastic detector pit lid is available both as lockable and nonlockable.

The lockable lid comes with a bolt mechanism to secure the lid to the pit. Both lockable and nonlockable lids are tethered to the pit.

Cast Iron Lid:

VRM provides the full service; pits and lids included, ensuring a perfect fit and assembly every time.

The Detector Pits' Cast Iron Lids are manufactured from high strength, ductile iron grade 600-3 to AS1831, enabling lightweight construction while maintaining maximum strength and integrity.

- VicRoads approved (#PA 030 264)
- Class B 80kN load rated to AS3996:2006
- Non-slip surface.
- Blends in to surrounding environment.
- Nameplate options available
- 300mm galvanized chain for tethering lid to pit
